

Cory Bystrom

Senior Director Bioanalytical Research
Ultragenyx Pharmaceutical Inc.

Although I've been involved in mass spectrometry and clinical diagnostics for nearly 20 years, I completed a BS and MS in Food Chemistry and worked in the food industry after completion of my postdoc. The explosive growth of interest in plant based protein alternatives has provided substantial opportunities for the application of mass spectrometry to fundamental question of protein structure and function with the intention of feeding the planet and mitigating impacts traditional animal agriculture.
