

Bio:

Dragana Noe is a Biomedical Scientist at the Precision Biomarker Laboratories within Cedars-Sinai Medical Center. She earned her PhD in Biochemistry from the Institute for the Application of Nuclear Energy at the University of Belgrade. With a deep-rooted passion for both discovery and targeted proteomics workflows, Dragana thrives on method development and biomarker research. Her adeptness in fostering cross-functional relationships has seen her successfully lead diverse teams globally. Her combined expertise in science liaison and marketing has empowered her to drive impactful initiatives while maintaining a steadfast focus on scientific research, establishing her as a versatile and respected professional in the field of biomedical sciences.
